Introduction

I have a PhD from Universiti Sains Malaysia's School of Health Sciences, with a specialization in Health Promotion. I am extremely interested in obtaining a position where I can contribute to Health-related education, training, and continue my research on Health Promotion and Disease Prevention.

My doctoral dissertation examines the use of a relatively new methodology for improving the knowledge and practice levels toward infection prevention and control among critical care nurses. I developed an integrated module with three interconnected components: an educational program, a digital monitoring system, and the creation of a supportive environment. I created and designed various infection prevention and control posters and brochures, as well as a book titled "Nursing Guide to Infection Prevention and Control" with copyright granted by Malaysian Intellectual Property. Other areas that interest me for future research, in addition to my dissertation research, stem from my goal of promoting health and preventing infections, which help to reduce the risk of epidemic diseases in the community (e.g. COVID-19).

My academic training and ten years of academic experience as a lecturer and chairman of Allied Medical Sciences Department in the Community College at the University of Tabuk prepare me to be an effective researcher and instructor. These experiences have built my confidence and an interest in teaching and I look forward to the opportunity to not only teach existing courses, but also work to develop new ones.

I am enclosing my curriculum vitae. I will gladly provide any other supporting materials upon request. Thank you for your consideration, and I look forward to hearing from you soon.

Sincerely,

Ahmad Tawfiq Sabbah

SUMMARY

I am Ahmad, a 39-year-old assistant professor. I'm a passionate Health promotion and diseases prevention specialist and eager to contribute to team success through hard work, attention to detail, and excellent organizational skills. I have 10 years' academic experience as a lecturer, as well as practice experience in the field of nursing and infection control.
